### The “Sweet List” Stock Report

The “Sweet List” is a weekly listing of stocks ( usually 50-60 ) that we have culled from the market as a whole. The stocks that make this list all have obvious signs that they are being bought or accumulated by the large money funds. We also take into consideration the “Sectors that are Working” report and the overall picture of the S&P 500(SPX) index in selecting these stocks.

The “Sweet List” consists of stocks that have not yet been fundamentally vetted, but they all have charts that show accumulation. We will explore many of these stocks fundamentally to drill down even further to find the best trading candidates.
