Sectors That Are Working

The, **Sectors that are Working** graphic report in the Members Area of the website is updated weekly and provides an outstanding quick glance view of where the big money Mutual Funds, Insurance companies and Hedge Funds are putting their cash. Since these entities and their volume purchases move stock prices, these sectors are where we want to invest, as well.

The top 10 or so “sectors that are working” are where we invest in our funds. These sectors are under accumulation and if the market as a whole advances, these cohorts and the stocks in them will lead. We use this information to make decisions for our stock trading accounts, the BlueSky and the Triple Array.

The EquiFund relies more on the Daily Coved Call Lists for trading ideas, but keeps in mind the “sectors that are working” as it helps to give us parameters to manage our risk.

This **Sectors that are Working** weekly report has been an invaluable component to the success of our trading.

Clear Eyes, Full Heart
